Careers Programme (Delivered through timetabled PSHE lessons in KS3)

| Lesson | KS3 Learning Outcome | Elements of Learning | Activities |
|--------|--|---|------------|
| 1 | Exploring careers and career development | Career exploration expands individuals' horizons for actions and opportunities, with the goal that a pupil's background does not prejudice their careers aspirations. An understanding of career processes and structures enables individuals to make sense of their own careers, understand the careers experiences of others and contribute in important ways to the career wellbeing of others. | |
| 2 | Self-awareness | Individuals who realistically appraise their qualities and skills, roles and responsibilities, values and attitudes, needs and interests, aptitudes and achievements are better able to understand themselves, make informed choices and relate well to others. Self-awareness is essential for nurturing self-esteem, identity and mental well-being. | |
| 3 | Preparing for employability | Preparing for employability is about enabling individuals to gain the skills and experiences they need to get, maintain and make progress in employment or self-employment including networking, negotiation, self-advocacy and staying healthy. The soft skills necessary for success are taught by exemplification and habituation. | |
| 4 | Handling applications and interviews | Know how to prepare and present yourself when going through a selection process. Promoting themselves in a way that attracts the attention of selectors and recruiters as well as managing the applications process requires individuals to develop a range of self-presentation and marketing skills including the use of digital and social media. This also requires that they develop strategies to cope with set-backs and disappointments. | |
| 5 | Planning and deciding | Know how to negotiate and make plans and decisions carefully to help you get the qualifications, skills and experience you need. Individuals need to know how make and carry out carefully considered and negotiated decisions and plans. This includes being able to respond effectively to unforeseen or unplanned choices and opportunities. | |
